

## INSULATED NAIL BASE ATTACHMENT. STRUCTURAL SCREWS.

SIP screws are used for attaching Nailbase/Structural Insulation Panels (SIP) to steel, wood, or CMU/concrete substrates.

### PRODUCT FEATURES

- Epoxy E-coating for corrosion resistance.
- SIP TP - Thread point for wood and timber substrates.
- SIP LD - Light duty drill point for corrugated steel deck and steel studs (16-20 ga.).
- SIP HD - Heavy duty drill point for structural steel (12 ga. or heavier).

\*Please contact us for solutions for attaching to concrete/CMU or for multi-layered wood over steel applications.
